Part 1 Business Operation

1. Policy and Business Overview

Our company focuses on being a stable insurance company for Thai people. We have an asset management as sufficiently reserve money both for the debt and insurance contract obligation including Risked-Based Capital Maintenance according to the law. Therefore, we have a strong financial status for serving people. Moreover, we choose the risk management efficiently by focusing on quality underwriting together with competitive strategic adjustment by finding new marketing channels through the counter services or online. Simultaneously, we consider the people requirements by developing good insurance products and services. Besides the transparent management with corporate governance principle, our company also has participated in the Social Benefit Projects without expecting any profit such as, Micro-Insurance Project which is focused on giving insurance services with easy-to-access price for people and Rice Insurance Project with the government since 2011 which has been created income stability for farmers.

There are 3 things of the company goal in operation: 1) Develop the company to have a strong financial status and management with good governance. 2) Develop valuable products to reduce risk and to alleviate properly people loss or damage. And 3) Develop standard service and create satisfaction fairly to our customers and partners. The company is ready to be the consultant of all insurances for customers and population by having various guidelines in organization development continuously, human and intellectual capital development, innovation development and operational process improvement to be standard and effective.

In 2020, the company had a new product of On-Off Motor Insurance with Top-Up campaign “Smaller Payment Bigger Coverage”. This was a new insurance with starting premium only Baht 4,900.- that could save 70% with all automatic On-Off coverage 24 hours as well as the maximum discount promotion of premium Baht 1,000.- for first 3,000 policies and brought part of income to donate the COVID screening cabinets given to 10 public hospitals nationwide.

Business operation of each product line

(1) Product or service characteristics

There are 4 main services of company as follows:

1. Motor insurance
 - 1.1. Compulsory insurance
 - 1.2. Voluntary insurance is divided into 5 types such as class 1, class 2, class 3, class 4, and class 5 with different coverage.
2. Fire insurance is making contract to receive disaster risk that the company agrees to pay compensation to the insured in case of the insured property is damaged from fire or lightning or gas explosion of household consumption and has coverage extension to water damage, explosion, riot, strike, hail, flood, earthquake, windstorm, and aircraft etc.
3. Marine and transportation insurance is making contract to receive disaster risk that the company agrees to pay compensation to the insured in case of the insured property is damaged from transportation.
4. Miscellaneous insurance includes several kinds of insurance such as personal accident insurance, travel accident insurance, health insurance, compensation indemnity insurance, critical illness insurance, contractor all risks insurance, burglary insurance, health insurance, global travel insurance etc.

(2) Marketing and competitive situation

A. Policy, important product characteristic and service

Competitive strategy to have rapid and convenient services as well as to create impression to the insured, advertise, use modern communication technology and provide staff training all time.

Advantage

- To operate the longest motor insurance business of all insurance companies in present which makes the company have experience for giving service to the insured and related person as well as to have the database of complete underwriting
- To have a long term relationship with customer base
- To have a company culture to understand customer and related person requirements which makes impression to the customer and related person in our services
- The company has a good customer base with risk distribution and a large amount of company fund that makes the company be able to handle risk in high level

Disadvantage

- All company insurances are come from direct market, not from the captive business

Target customers

For the industrial risk, most insurance is an insurance with the insurance company to have relationship in form of investment. Therefore, from the company structure, we have a target to

do business with small or medium customer groups which they have high independent to select the insurance company. It is an outstanding in our service and product development that are suitable for consumer needs and enable to have influence on customer decision making.

B. Competitive situation

The total insurance premium market in 2020 is 253,580 million Baht increasing 3.9% from 2019. The COVID-19 epidemic has severely affected the purchasing power of consumers. To adjust an increase of motor insurance premiums due to higher car repair expenses resulting the growth rate of motor insurance has decreased. Residential refinancing, multi-purpose loans with real estate as collateral continues to expand and contraction in foreign reinsurance companies' reinsurance capacity makes Fire & IAR insurance premiums increase. The personal accident and health insurance premiums also increase as awareness of health and high medical expenses. The company uses technology in sales, product design to meet the customer needs today and importance realization of the travel and accident insurance resulting finding insurance policies easier and more demand. This insurance premiums grows in the same direction as health insurance. The company emphasizes innovation leadership, digital strategy adaptation and taking technology to develop new products for both corporate and retail customers. We sell through various distribution channels to reach the most targeted customers such as agents, brokers, banks (Banc assurance), financial institutions, telemarketing, convenience stores, online channel and claim services improvement via Smartphone applications.

(3) Products or services

A. Sources of fund

Non-life insurance business has the major income from insurance premium. Insurance policy is the company product which is made through 3 types as follows:

1. Selling through Insurance Agent in Non-Life Insurance Act section 4 “Non-Life Insurance Agent means a person who is delegated by company to convince people to do the insurance policy”.
2. Selling through Insurance Broker in Non-Life Insurance Act section 4 “Non-Life Insurance Broker means a person who advises or manages a person to do the insurance policy by expecting to get commission”.
3. Direct selling by the company employees.

B. The ability to maintain the ratio of each business class

The company has maintained the fund of operating non-life insurance not less than Baht 30 million by considering the ratio of fund sufficiency. It calculates the company fund divided by the maintained fund not less than 140 percent. As of December 31, 2020, the company has the fund as accounting Baht 1,350,942,191 and there was a level a level of capital adequacy as CAR Ratio 287.35

C. Liquidity

Liquidity management for insurance premium of the company to the suitable loss ratio, in the year 2020 the loss ratio is 57.73% increasing 2.28% from 2019.

(4) Vision, mission, and long-term goals of the company

Board of directors the Company has reviewed the vision, mission, strategy, and long-term goals of the company annually to consider the suitability and be aware of various operations. In the year 2019, the Board of Directors considered that the company's vision, mission, strategy, and long-term goals is suitable. Vision is a stable guarantee for Thai people that people trust in choosing the most service. Mission: Develop the organization to have a strong financial position and manage with good governance. Develop worthwhile products that can help reduce the burden of risk and mitigate the damage of the people appropriately. Developing services to meet good standards helps to increase customer satisfaction. And fair partners. Long-term goals: Being the leader in innovation for the non-life insurance industry throughout 10 years.

3. Risk factors

Risk factors of non-life insurance business can be classified as follows:

1. Strategic Risk

It is the overall policy on the business portfolio level, product type, industry, geographic area including the operation plan which increase the company risk such as focusing on quantity growth or market share more than the profit value, increasing on sales volume with competitive insurance premium to take high and low risk insurance, selling high risk

product with low profit to keep customers and business alliances, including risk factors that effect company not to achieve the business target.

2. Operational Risk

It is the risk that occurs in the working area and operation which caused from

- People Risk such as lack of knowledge, skill, experience and responsibility; carelessness; insufficient staffs that cause human error, fraud of staff including fraud claim from customer or partner such as garage, hospital, etc. The company has managed people risk by arranging training program for the staffs periodically and setting up recruitment plan that is in line with company expansion plan. In addition, internal control process is implemented to ensure the transparent operation.
- Process Risk such as deficient working system, weak internal operation process, structure organization of inter-control unit, responsibility division in approved person and paid, specification of approval limit. To mitigate the process risk, the company has reviewed its operating process and working manual continuously in order to make the operating process become more effective.
- Technology Risk such as inefficient computer system; incorrect, delay and pirated data.
The company invests in up to date hardware and software, sets to have security process, limits to information access for only authorized or approved person.

3. Liquidity Risk

It is the risk that occurs from unable to provide enough cash flow for the credit payment and obligation.

- To assess the financial status before appointment to be an agent and broker.
- To collect the motor insurance premium as the Cash Before Cover Principle.
- To create the tracking system for the overdue premium collection from an agent and broker.

4. Insurance Risk

It is the financial loss risk of underwriting and liability risk that results from selection and approval of the underwriting risk, ratio between retention and risk transfer including look after the claim management process of company to be concise, systematic, accurate as the actual damage occurred.

- The company has the risk management systematically by starting underwriting, coverage, premium rate suitable to the risk.
- The company provides risk transfer to the reinsurance company that has stable status both domestic and international.
- The company has the correct and fast indemnity payment system according to the coverage, manages to have a low level of loss ratio in each type of insurance.

5. Market Risk

It is the fluctuation of investing asset returns which result from the fluctuation of interest rate, equity value, foreign fund etc.

- To build the stable investment return in the long term higher than the inflation rate.
- The investment policy of company in asset allocation is the investment mix for diversification by giving the weight of investment of criteria as the Office of Insurance Commission that focuses on safety and careful investment. The company divides investment to different asset classes by considering the investor situation to accept risk on and risk off including decision to choose the asset diversification into low risk such as government bond, debenture, equity of the high stability company to have regular income and profit, not much fluctuation, liquidity and high dividend that help create a high level returns.
- The ways of investment management, to adjust investment plan to be consistent and timely in the worldwide equity market situation that has more connection. The upside inflation and interest trend in market fluctuation increase returns more than the market. To make more active management, adjust investment portfolio to the tactical asset allocation between asset and security selection in order to support changing of financial economy trend not more than 1 year or to have the event risk and adjust to the dynamic asset allocation 1-3 year in order to cope with the economic cycle change such as in the economic recovery period and no inflation problem that increase portfolio in equity investment.

6. Credit Risk

It is the risk of counter parties especially their deteriorate financial status, default risk such as reinsurer, broker, debtor, guarantor. If the customer is unable to fulfill an agreement, it affects the company revenue and operation. We use the Credit Rating to select reinsurers and have an investment as the Office of Insurance Commission's rules. The company has an audit system and constantly monitors to follow up the counter parties in order to minimize credit risk.

9. Corporate Governance

9.1 The Board of Directors of Thaivivat Insurance Public Company Limited recognizes the importance of fostering good corporate governance as it helps to ensure efficient, transparent and verifiable management system within the organization which will in turn help to build stronger credibility and confidence among the shareholders, investors, stakeholders and relevant parties. At the same time, it is an essential tool in building corporate stability. Hence, corporate governance principles and related practice have therefore been established as per the following details:

1. Rights of Shareholders

The Company prioritizes and respects the rights of the shareholders by promoting equitable rights among all major and minor in accordance with the laws. This shall include the rights to buy-sell or transfer shares, profit sharing, have sufficient access to the Company's business information, be notified of the Shareholders' Meeting, including the rights to attend meetings to cast a vote, the rights to ask questions at the meeting or submit questions in advance of the meeting, the rights to appoint or remove directors, the rights to determine remuneration for the Board of Directors and the rights to appoint an Auditor and determine Auditor's Fee as well as other matters that may affect the Company such as dividend allocation and capital increase or decrease, all of which must be in compliance with legal requirements.

The Company supports the rights of shareholders by encouraging and promoting every group of shareholders as well as institutional shareholders to attend the Shareholders' Meeting, including ensuring the disclosure of related information, date, time, place and agenda of the meeting as well as providing explanations accompanying each meeting agenda or meeting resolution stated in the notice of General Shareholders' Meeting and Extra General Shareholders' Meeting or any enclosed documents thereof.

The Company also gives the shareholders the opportunity to submit in questions prior to the day of the meeting. All questions must be written clearly and must be notified to the shareholders through meeting notice.

The Company prepares Proxy Form B for the shareholders to be able to determine the direction of voting, including allowing at least one Independent Director to be an alternative proxy holder of the shareholders. At each Shareholders' Meeting, each item must be voted separately in case there are more than one items on the agenda such as an agenda to consider and approve the appointment of directors.

The Company also requires the use of ballots for important agenda such as connected transaction or transaction relating to acquisition or disposition of assets to ensure transparency and verifiability in case of later disputes.

During the meeting, the Chairman should manage the time appropriately and encourage all shareholders to express their opinions and raise questions relevant to the Company's business.

The Company prepares meeting minutes and discloses meeting resolution to the general public regarding the number of votes for each agenda at every General Shareholders' Meeting and Extra General Shareholders' Meeting via SEC website and the Company's website on the following day.

In 2020, the Company held General Shareholders' Meeting on April 24, 2020. The meeting was attended by five directors (due to the epidemic of COVID-2019) the company assigned Thailand Securities Depository Company Limited, the registrar of the Company's shares, to deliver meeting notices to the shareholders fourteen days in advance of the meeting. The Chairman equally allowed all shareholders the right to inspect the company business operations, to ask questions and express opinions which had been recorded in the meeting minutes.

2. Equitable Treatment among Shareholders

By realizing great importance of shareholders, the Company has therefore continuously supported equitable treatment among all shareholders, whether they are major or minor shareholders, foreign shareholders or institutional investors, by upholding the following practices:

The Company allows minor shareholders to make nominations for director position, including proposing additional agenda prior to the day of the Shareholders' Meeting within appropriate timeframe.

The Company allows those shareholders who are unable to attend the meeting to grant the power of attorney to his or her representative so that they can attend the meeting and cast a vote on their behalf.

The Board of Directors requires directors and executives to disclose information in relation to their stakeholding and that of relevant parties so that the Board of Directors may consider those business transactions with potential conflict of interest and make decision to ensure the overall benefits of the Company. Those directors and executives having stakeholding in any transaction relevant to the Company should not participate in the decision-making process of such transaction

The Board of Directors formulated Insider Trading Policy in order to prevent the use of internal information that may affect buying-selling of securities of the Company. This policy aims to prevent directors or executives from improperly using internal information to achieve personal interests or interests of others. No directors, advisors, executives or staffs having gain advance knowledge of the Company's operating results either directly or indirectly, including relevant parties are allowed to buy or sell the Company's shares during the 60-day period prior to the disclosure of the Company's financial statements to the general public. Throughout the past year, the Company's directors and executives have strictly complies with such policy and no buying-selling of shares had been observed during such period. Moreover, executives or departments that have authorized access to internal information are prohibited from disclosing such information to external parties or irrelevant persons as per the details disclosed in Insider Trading Section.

3. Roles of Stakeholders

The Board of Directors places great importance on the rights of both internal and external stakeholders and shall avoid every action that may violate the rights of stakeholders. The Company shall continuously ensure equality among all parties and has therefore determined the roles of the stakeholders as follow:

Shareholders The company adheres to business operations according to corporate governance principles and provides adequate and efficient internal control and risk management systems as well as strengthens the business to create long-term benefits for shareholders. The Company is committed to achieve good operating results to ensure good profits and satisfaction to the shareholders and encourages

the shareholders to exercise their basic rights which they are entitled by the law and company's regulations such as the right to attend general meeting of shareholders and vote on various agendas, directors election, consideration and approval of profit allocation and obtaining accurate, complete and up-to-date information on important business operations through the Stock Exchange of Thailand and company's website besides the above rights.

Customers The Company recognizes the importance of good service quality for customer satisfaction and reliability in providing the Company's services by developing services to be able to respond to customer needs in time together with developing high quality products as customer demands to ensure highest customer satisfaction and facilitate various channels for customers to easily access products and provide accurate information about products and services.

The company has set up a customer relations unit to serve as a preliminary answer to inquiries of customers regarding products and services As well as the complaint handling unit to coordinate with the relevant departments to resolve problems for customers. In addition, the company also provides a channel for receiving complaints for customers through the company's website.

Employees The company recognizes employees be the most valuable resource to help achieve the company's goals. The company is equal to its employees and arranges for awards or appointments to move appropriately based on employees' knowledge and capabilities including regular training for employees to acquire knowledge about insurance products in order to advance their career. In addition, the company encourages all employees to show their abilities and listen to all employees' suggestions without discrimination.

The company has established a concrete assessment criteria in performance consideration.

The company has a clear and concrete set of compensation and benefits for its employees with policies comparable to other leading non-life insurance companies. The determination of short-term compensation is based on the yearly profitability and long-term consideration of performance measurement based on the Balanced Scorecard, including improvement of employee welfare as current economic conditions for employees to have a good quality of life. The company encourages employees to have knowledge and understanding of money management, selection of investment policies that correspond to the age range and risk level as well as to provide welfare and other benefits such as provident fund, employee loan welfare and annual health check.

Trade Partners The Company is committed to perform its business with fairness and ensure equitable treatment among all trade partners as well as strict compliance with the terms and conditions set forth by the trades and agreements in which the Company is engaged. The Company shall also emphasize on selecting appropriate trade partners that possess a keen sense of morality, professionalism and good reputation.

- Competitors The Company shall compete in a manner which demonstrates a keen sense of morality and shall not violate or obtain any trade secrets of its competitors by unlawful methods. The Company shall strictly uphold fair competition and shall not attempt to seek any trade secrets of its competitors by inappropriate means or discrediting its competitors.
- Creditors The Company shall pay all debts within the specified timeframe, strictly comply with agreement terms and conditions and ensure equitable and fair treatment among all creditors, particularly in terms of guarantee terms and conditions and capital management. In the event of failure to comply with the established terms and conditions and resulted in defaults, the Company shall immediately notify relevant creditor in advance without concealing any facts in order to jointly seek fair and reasonable solutions, including ensuring appropriate capital management structure in order to maintain reliability among creditors.
- Debtors The Company shall strictly comply with the agreement terms and conditions. In the event any debtor fails to comply with the agreement terms and conditions and resulted in defaults, the Company shall conduct negotiation in order to seek fair and reasonable solutions.
- Society and Environment The Company recognizes the importance of corporate social responsibility and is therefore committed to continuously support and participate in social and community development activities.
- Human Rights By realizing the importance of human rights, the Company therefore set up human rights-related policy which provides equal rights and freedom among every employee in performing his/her duties, including career growth in accordance with the Company's regulation. The Company shall also share some knowledge and understanding on basic human rights to be applied in intellectual property-related works. The Company shall strictly comply with intellectual property laws. It also established a policy which prohibits the support of any operations that may result in the violation of any type of intellectual property rights. Meanwhile, every employee shall be responsible for securing the confidentiality of all information in relation to the Company's intellectual property whether it be insurance products, computer system, operation manual or any other items developed by the employees during operation as assigned by the Company and must not use any intellectual property of others without the owner's consent.
- Anti-Corruption The Company has determined anti-corruption policy and related practice, all of which has been approved by the Board of Directors and disseminated among the employees, trade partners and general public to be strictly followed. The company was certified as a member of the Thai Private Sector Collective Action Coalition against Corruption. In this regard, the company has provided a channel to report and report fraudulent clues when encountering any fraudulent act and there is a measure to protect the whistleblower to ensure safety.

4. Information reveal and transparency

The Board of Directors is the one who responsible for Financial Statement of company. Financial Statement will be made up according to the Accounting Standard certified by overall in Thailand. By using Accounting Policy that suitable and practice in a regular way and carefully use discretion and good estimation in the making. Including enough information reveal in the remark combined to the Financial Statement.

The Board of Directors provide the company to have Internal Control for making sure that accounting information keeping is correct and complete together with establish the Audit Committee which includes member that not an Executives to be the person responsible for financial report and Internal Control System by represent the report of Audit Committee in the Annual Report.

Company has defined a clear policy of committee compensation. The compensation will be at the same level in the industry and high enough to retain the member that has the qualification as required which was approved from the shareholder meeting. In the part of compensation to the Executives will follow the principle and policy that defined by Board of Directors which related to the company performance outcome and performance of each Executives. Financial compensation was identified in the page 34-38 2but not reveal the compensation of the member that is the Executives in the part of being received from become other company committee because it is not the company information.

Board of Directors are aware of company's information that affect to the decision of investor and stakeholder of company. Then, we focus and practice with the Executives about information reveal that complete and reliable.

5. Responsibility of Board of Directors

The board of directors has an important role in corporate governance and must be independent in making decision for the best interest and overall shareholders. The board is responsible to determine the company's vision and mission for executives and employees aiming to operate in the same direction. In 2019, the Board of Directors has reviewed and approved the vision, strategic mission, goals and directions of business operations including important policies review to be appropriate and consistent with business operations as good corporate governance principles such as corporate governance policies, Anti-Corruption Policy etc.

The board has monitored the implementation of company's strategy. The board meeting in every quarter, the board has followed up the management performance by specifying a report on the operation results and company performance especially in terms of financial goals and various plans according to the strategy plan and is responsible for overseeing risks and internal control systems of the whole company. The Risk Management Committee is responsible for determining the company risk management policy with the risk management department to support and propose the result of consideration, risk management and internal control to the Audit Committee consideration for report to the Board of Directors.

Duties of the Chairman of the Board

The Chairman's main function is managing and leading the Board of Directors. The Chairman is responsible to the Board of Directors and acts as a direct liaison between the Board of Directors and company management through the President including the resolutions transfer of the board to related parties to ensure that the Board resolutions are carried out with the highest efficiency and appropriateness. The different responsibilities between the chairman as policy leader and the President as a management leader. The company therefore clearly separates the chairman roles from the president that means

the chairman is independent from the management, no benefit and business or other relationship which may obstruct the use of independent discretion.

Scope of duties of the board

The Board of Directors has the power and duty to manage company as the objectives, regulations and resolutions of the shareholders' meeting. The Board of Directors cannot approve or consider any matter unless approved by the directors majority vote attending the board of directors' meeting.

Scope of duties of the President

The President has the power to approve normal business operations in various matters such as operating expenses, selling and administrative expenses and capital expenditure within the limits set by the Board of Directors, etc.

There are 9 members of Board of Directors combined with 4 members that is executive, 1 member that is non-executive and 5 independent members. In the part of Chairman is independent member. No any relationship with the management part and the same person with President. For duty separation to define the policy of control and routine management, the company just only has the Executives committee and Audit committee which has assigned member and responsibility in detail at page 20-29.

Committee has set up the meeting every 2 months by clearly define the agenda in advance and has the routine operation result follow up session. Company Secretary Department has organized meeting invitation letter with meeting agenda and documents before the meeting for 7 days to have the committee study the information before go to the meeting. The meeting will take about 2 hours and was noted down in writing and keep the past minute of meeting that was accepted from the committee.

Company foresees the important of Internal Control System both in the management level and operation level. Then, we have defined the duty, operation authority of management and operation in the form of writing. There is the control of company asset usage to create benefits and duty separation of operation, controller, and including evaluation to create a cross check mechanism between each other in an explicit way. Company has the Internal Audit department responsible for audit the main working operation and financial activity of company that it was perform in the way that was defined. Abide by the law and regulation that related to the company (Compliance Control). Committee was assigned the Internal Audit to report directly the audit result to the Audit Committee and receive evaluation result from the Audit Committee for having independent to the Internal Audit and enable to fully perform the audit responsibilities.

Adopting good corporate governance principles for Listed companies in 2019 to apply, the Board of Directors has determined to improve the corporate governance principles of the company in accordance with the principles of good corporate governance for listed companies in 2017 and requiring regular review of compliance with good corporate governance principles at least once a year

10. Social Responsibility

Thaivivat Insurance Public Company Limited prepared this Corporate Social Responsibility Report for the year 2020 to reflect its policy, strategy, thinking process and its business operation in the capacity as a finance institution which contributed to the development of Thai society in terms of financial stability for Thai people and Thai business through insurance business transaction of the Company as well as the disclosure of its operating results to interested parties, not only in the financial aspect, but also in the aspect of social and environmental issues. The Company had the policy of running its business under the ethical principles and good business governance, taking into account the social and environmental responsibility at the distant and immediate level. It therefore plunged into the CSR-in-process and the CSR-after-process continually.

- Guidance for Reporting

This Report covered the operation in 2020. The information was compiled from its previous operations, particularly, centering on its operation at the head office, the principal office, to lay down the policy, strategies and the operations as a whole of the Company. Moreover, mentions were of the guidelines for development of the company and its personnel to be ready for the responsibility according to the mission assigned as well as the data in relation to its internal operations along the CSR line concerned.

Thaivivat Insurance PCL was aware of its limitation and its readiness to declare the information in the Report. However, this report applied the guideline on preparing a report based on the corporate social responsibility of Stock Exchange of Thailand as a reference framework for consistency with the standard of a listed public company in the Stock Exchange of Thailand in which the Company was listed since 1993.

- Criteria for Reporting Content Selection

The Company had considered matters in relation to Corporate Social Responsibility (CSR) based on the nature of the Company's business which is being the number one provider of non-life insurance service that is most widely trusted by the customers and determined corporate vision of offering stable security for Thai society. The Company's corporate missions are as follow:

- 1 Development of the organization to strong financial standing and management based on good corporate governance.
- 2 Development of the products to be more cost-effective enabling the reduction of risks and alleviation of loss of the public appropriately.
- 3 Development of service to good standard, thus fairly enhancing the customer satisfaction and trading partners.

All of which are the keys to steering corporate performance in relation to economic, social and environmental aspects in the direction that will help to ensure the mutual interests of the stakeholders at every level.

Since 2015, the Company began to create mutual values in addition to the existing corporate vision and missions in order to instill common operational practice from theoretical to operational level to ensure consistency and concrete implementation of the defined corporate vision and missions. The Company also tried to promote personnel engagement to create a sense of unity within the organization. This includes:

Trusted Upholding professionalism to build customer trust	1. Conduct business with fairness 2. Promote anti-corruptions 3. Disclosure of information and reports
Progressive Continuously develop products and services to address every consumer demand	4. Responsibility toward consumer 5. Develop products and services that will help to uplift the quality of life and society
Innovative Using latest innovation to deliver service excellence	
Togetherness Demonstrate compassion and care for others as if they were part of the family	6. Personnel Benefits 7. Carry out community and social development 8. Conduct environmental management

In order to categorize the level of importance of each CSR aspect, the Company had also taken into account the opinions of the stakeholders.

Important for interested persons	Very important	Social and community development Respect for human right	Responsible to consumers (production and service) Operate business with fairness Anti-fraud Disclosure of information and report
	Important	Use of resources (management of environment)	Care for personnel (fair treatment of labor) Corporate good governance Risk management
	Important		Very important

GOOD CORPORATE GOVERNANCE AND FAIR BUSINESS OPERATION

- Policies and Guidelines

In the aspect of corporate governance for business transparency, verifiability, the company followed the principles of good corporate governance. For this purpose, the company set up a supervisory unit to ensure that various operations went properly according to various regulations and the provisions of the law of the Office of Insurance Commission (OIC) and other supervisory organizations concerned, namely, the Stock Exchange of Thailand (SET) and the Office of Securities and Exchange Commission (SEC) and the Anti-Money Laundering Office (AMLO).

Thaivivat Insurance PCL took into account equality, fairness, avoidance of taking unfair advantage and the honesty in running the insurance business through protection of the interest in collaboration with persons involved who would be treated fairly in the course doing business by strict compliance with the law and rules jointly formulated; espousing business ethics in doing business, not demanding for, not receiving and distributing any interest in bad faith in trading with the trading partners according to the principles of good governance.

As of December 18, 2017, Thaivivat Insurance Public Company Limited received the Thai Chamber of Commerce Business Ethics Standard Test Award 2017 (TCC BEST Award). The award presentation ceremony held to honor companies with excellent policies and practices on good corporate governance, transparency, and corporate social responsibility.

Corporate Governance Related Agencies

The Compliance Department was established under control of the Benefits Department as a center of compilation and tracing data and information of relevant external regulations. The regulations are translated and/ or summarized for benefits of company's departments and personnel to comply with those relevant regulations. Moreover, an internal audit unit was set up as an independent organization, to report directly to the Audit Committee and the Company's Board of Directors, to have the duty to audit, review internal activities, operations within the company; to provide counseling, propose opinions and advice on remedying, improving the operation properly and efficiently. As regards the report on good governance, it was already reported in the Form of Items of Annual Data 2020 (Form 56-1) on the heading of "Management." And on website www.thaiviat.co.th

ANTI-CORRUPTION

Thaivivat Insurance PCL was aware of problem of corruption which affected the Company's ability for competition and sustainable development to the extent it increased the cost of business operation, resulting in lowered operating efficiency, thus failing to create maximum benefits for consumer. The company therefore attached importance to anti-corruption of all forms, not only in the light of violating the law, but it was contravening the good moral virtues and ethics; it was therefore unacceptable behavior.

By recognizing the importance of preventing corruption and supporting anti-corruption operation in wider scale, the Company therefore developed Anti-Corruption Policy and Code of Conduct for Anti-Corruption and has continuously carried out transparency and operational performance review and audit on yearly basis, including ensuring that the Company's operational performance in all aspects are in compliance with the determined operational standard. The Company's Anti-Corruption Policy shall be reviewed on two-year basis as deemed appropriate or whenever significant changes are required.

Thaivivat Insurance Public Co., Ltd. had passed an assessment process that had a policy and complete anti-corruption guidelines according to criteria of the Private Sector Collective Action Coalition Against Corruption and certified as a coalition member on 14th October, 2016 and certified for renewal as a project member on 5th August, 2019. This was the national project supported by government and Office of the National Counter Corruption Commission. The company has joined with the government, civil society and the media to create transparent business standard, free from corruption and being a part of country upgrade.

Based on recent audit results, Thaivivat Insurance Public Company Limited had fulfilled the requirements of Private Sector Collective Action Coalition Against Corruption Council by having fully developed and adopted Anti-Corruption Policy and Code of Conduct for Anti-Corruption throughout the organization, allowing the Company to become an official

member of Collective Action against Corruption on October 18, 2017. Since Private Sector Collective Action against Corruption is under the support of the Thai Government and Office of the National Anti-Corruption Commission (NACC), the Company therefore worked closely with the government sector as well as civil society and mass media sector in setting transparency and anti-corruption standard within the business industry, including taking part in developing the country.

On 18 October 2019, the company received a certificate from Thailand's Private Sector Collective Action Coalition against Corruption (CAC) at the CAC National Conference Day 2019. The project's main objective is to encourage businesses to create concrete anti-corruption policies and adopt mechanisms to prevent bribery in order to build and expand a strong network of clean businesses.

The Company also regularly communicates its Anti-Corruption Policy and Code of Conduct for Anti-Corruption among its personnel via various channels, provides in-house personnel capacity development training programs and even communicates with its trade partners and external agencies through notices which require their cooperation in avoiding acceptance of gifts of every kind. The Company also determined Whistle Blowing Policy which provides several channels for whistle blowing or complaints as follow:

- Laundering Prevention and Suppression Policy

RESPONSIBILITY TO CONSUMERS

The company is committed to ensuring product satisfaction and service confidence of the insured through service quality and reasonable prices that are compliant with the Office of Insurance Commission (OIC)'s regulations. This means that forms and messages in insurance policies must be clear and consistent with the insurance premiums using correct insurance terms to avoid inaccurate legal interpretation for claims. Moreover, the company applies appropriate interest rates approved by the Registrar.

In addition, various insurance options have been developed to meet the changing needs of the Thai society, and services are continuously improved to respond to technological shifts in order to ensure quick and convenient services for the insured and to foster long-lasting customer relationships.

- Compensation for incidents

The stability of an insurance company, a financial institution, is vital to the reliability of its insurance products and directly affects the insured and the country's overall economy, especially in terms of its ability to compensate. Thaivivat Insurance Public Company Limited recognizes the importance of maintaining a good financial status according to the law and regulations such as those of the OIC. In 2019, the company had more than 300 percent of the capital adequacy ratio in its third quarter, firmly guaranteeing its ability to accept claims and pay compensations.

- Claims service

The company has set a policy for compensation payment to ensure that claims service is quick and helpful. Claims are paid within 14 days from the date on which the claim is agreed in order to ensure speedy response to the insured. The company strictly follows the terms and conditions that it has with customers to avoid litigation which may damage the company.

The company has applied innovations and new information systems to its insurance services by adopting the E-Claim system to improve claims management services and convenience for customers in accidents. To enhance service quality, accident inspectors can print repair order instantly at the point of accident 24/7 across the country. Additionally, the company has opened 29 branches nationwide to offer claims services and provided repair services for car insurers at participating car service centers to ensure convenience of the insured in claiming compensation and acquiring counseling services.

- Insurance product development and innovation

The company has always strived to develop products to meet consumer needs in order to enhance the reliability of the insurance industry and build public trust, reflecting our commitment to insurance product innovation. In 2020, we applied technologies to our insurance business to respond to consumer demand and increase the convenience of our services including:

- Thaivivat Active Health Insurance development

Active Health Insurance is an insurance product that has continuously been improved and developed. After its official launch in 2018, the company has aimed to motivate Thai people to take good care of their health since health is the basis for every aspect of life. When Thai people take good care of their health and have adequate risk prevention, they will be able to fulfil their life goals. This encourages the company to improve its products, and with the concept of health insurance that provides protection and care in the event of illnesses, Active Health Insurance aims to reduce health risks and allow the insured to live freely with a healthy and happy body and broad coverage from the product.

In 2020, the company has improved its products to provide greatest benefits for consumers by developing health insurance policies that can better meet the needs of consumers by introducing the Silver plan with a monthly insurance premium of 1,100 baht to meet the needs of customers who are facing the high cost of insurance services, allowing them to acquire an insurance policy that is most suitable to them.

In addition, the company has introduced coverage for COVID-19 screening in response to the COVID-19 outbreak to increase protection for customers during the challenging times. Additionally, the company has developed mobile applications and applied wearable technologies to accurately measure physical performance of consumers. Other benefits are also offered to consumers to meet their lifestyle including their food and exercise preferences. Active Bonus Point is given to incentivize consumers to exercise with a variety of exercise options including exercise classes and discounts for healthy food products to promote good health in all aspects of life. Moreover, the company has cooperated with our partners to organise activities that encourage exercise such as the 30 Days Challenge Season 2-Fit Hoon, Suay, Ruay Nguern San, an activity in which participants compete to lose fat and get firm within 30 days. Participants must weigh and get their fat mass measured from the first to the last days of the activity. Participants received nutritional information for weight control and proper exercise, just like having a personal trainer to help you plan your weight loss programme.

- "On-Off Car Insurance" development

In 2019, the company continued to enhance its innovative products, and the on-off car insurance is one of the products which have continuously been improved in terms of its services and features to meet consumer demand through the

best service and benefits. The intelligent on-off insurance system, TVI Connect, has recently been introduced to transform the experience of turning on and off insurance coverage within the insurance industry using the NB-IoT technology under the collaboration of global innovation leaders including Thailand's No.1 telecommunications service provider, AIS, and the world's No. 1 cloud service provider, AWS, in developing hardware and real-time data connection to meet all consumer needs. The special feature of the TVI Connect device is that it can turn on and off insurance coverage as the car engine starts and stops.

All operations are enabled by the device itself without the use of Bluetooth or even the internet from a mobile phone. Consumers can check usage status through Thaivivat Motor Application with notifications sent every time the insurance is turned on and off, eliminating consumers' pain points in forgetting to turn on and off insurance coverage, in wasting their internet speed, and in running out of phone battery. The insurance also allows the car to be shared by many people without the driver having to install the application on his or her phone. The TVI Connect can easily be installed by connecting to a car's USB port. The TVI Connect system has passed stability and performance tests with AIS's NB-IoT network that covers 77 provinces nationwide and AWS's cloud system that supports 99.99 percent of the insurance's performance and the switching on and off of the insurance coverage for up to 10,000 times per second, representing a practical and complete example of IoT application in the Thai insurance industry today.

➤ “On-Off Travel Insurance” development

In 2019, the company continued to improve travel insurance innovation to enhance service convenience and respond to consumer needs with a focus on technological application in daily life. A new travel insurance product has been developed to allow travelers to plan their trips by themselves and reduce their premium expenses with insurance premiums charged according to the actual number of travel days. The “Thaivivat Travel” mobile application has recently been introduced to provide travelers with greater convenience during their trips by offering translation service to allow travelers to communicate easily with local people and foreign currency information which is very useful for international travelers.

➤ A variety of ways to purchase and pay premiums

In terms of service, the company has developed various ways to access insurance products and has continuously improved the quality of its various insurance services. The company offers various channels to customers to purchase insurance including agents, brokers, service counters in department stores, service counters in convenience stores nationwide, Thaivivat's website www.thaivivat.co.th, and LINE Official Thaivivat Insurance. The channels meet the Department of Business Development's security standards for insurance purchases and online payments, providing the insured with various payment options including credit card, payment at a bank, and other mobile payment.

● Other services

➤ Customer Center To provide convenience to the insured, trained staff are ready to offer advice to customers and solve customers' problems.

In addition, the Customer Relations Center is also a department that collects information about customer satisfaction in the company's services. The information of the problems stored at the center will be used to improve the company's services and operations. Customers can contact the center at 1231 on working days (Monday-Friday from 8.00-18.00 hrs.) or via the website www.thaivivat.co.th and Facebook page www.facebook.com/thaivivat.

➤ Accident Report Center To provide quick service to the insured across the country, especially

those with car and health insurance, the company has set up a center for accident reporting and inspection that operates 24/7 using real-time tracking technology and GPS to show the location of accident inspectors. Staff at the center can notify the accident to the nearest accident inspector to ensure quickest service that provide confidence to the insured. Customers who have registered and installed the Thaivivat Application on mobile phones can report the accident by selecting "Report an Emergency" without having to dial a phone number or sending the accident location to the company.

You can contact the accident reporting center every day at 1231, 24 hours a day.

➤ Roadside Assistance is a service for the insured in the event of a car breakdown which may

be caused by the malfunction of the engine or other devices of the car. Staff are there to provide technical advice to assist customers in resolving the situation as well as on-site technical services which offers basic assistance at the point of accident including towing service to the repair center. The service is available 24 hours by contacting the accident reporting center.

Product and service developments that help improve the quality of life and society

Community and social development is an important part of sustainable business development. Today, every business sector is demanded to conduct business with greater consideration of social responsibility; therefore, the company must pay greater attention to the development of communities and society as a key factor for sustainable growth within the insurance industry. The company recognizes the importance of insurance and access to insurance for the majority of people and has offered micro insurance and focused on minimizing the damage from road accidents which is in line with its core insurance product or car insurance. The company has carried out those initiatives through the following excellent service projects during the New Year's and Songkran festivals in 2017:

- Micro-insurance

The company has worked towards community and social development following the Office of Insurance Commission (OIC)'s policy as stated in the Third Insurance Development Plan (2016-2020), especially in terms of knowledge enhancement and access to insurance through the promotion of retail insurance products.

To promote insurance as a guarantee for people's life and property and to alleviate the government's burden in compensating people as part of the country's development, the company has offered a variety of insurance products that are suitable for people with different social and economic needs with a focus on allowing access to the insurance system by all. Therefore, the company strives to promote retail insurance or "Micro Insurance" which offers easy-to-understand coverage, low insurance

premiums, and access to people at all levels through a wide range of distribution channels. The company's key insurance products in 2017 included:

1. Cancer micro-insurance

Thaivivat Insurance co-operated with Counter Service to offer micro insurance products through Counter Service, which has more than 6,000 branches in Thailand, to provide easier access to insurance. The products include cancer micro-insurance that provides coverage for all types of cancer except skin cancer with a 711-baht annual premium that offers an insured sum of up to 70,000 baht and cancer micro-insurance that provides coverage for all types of cancer including Melanoma cancer but excluding skin cancer.

2. In-season rice insurance for 2020 harvest season

The company is one of the 17 companies that participated in the government's in-season rice insurance programme with the objective of providing financial protection for farmers in the target areas of 45.7 million rai across the country, reducing the cost and risk that may occur with their crops. Farmers would receive coverage for eight types of natural disaster including floods or heavy rains, drought or intermittent rain, storm or typhoon, cold weather or frost, hail, fire, and wild elephant. Farmers would receive the basic coverage of 1,260 baht per rai (Part 1) and an additional coverage of 240 baht per rai (Part 2). For coverage for pests and disease epidemics, farmers would receive a coverage of 630 baht per rai (Part 1) and an additional coverage of 120 baht per rai (Part 2). If the governor announced the insurance area as the area for emergency disaster victims, farmers who purchase the insurance (Part 1+Part 2) would receive coverage of up to 1,500 baht per rai and coverage for pests and disease epidemics of 750 baht per rai. The insurance is available at the Bank for Agriculture and Agricultural Cooperatives for easy access.

200 micro-insurance
The company is one of the insurance companies that participated in the "200 Insurance" project in collaboration with the Office of Insurance Commission (OIC). 200 Insurance is a personal accident insurance for individuals which provides a coverage of 100,000 baht for death, loss of hands, feet, and sight, and permanent disability caused by an accident, 50,000 baht for homicide, and 10,000 baht for death caused by an illness. The annual premium is 200 baht for people aged 20 to 60 years old with an aim of providing the opportunity for people of all levels to purchase accident insurance at an affordable price.

3. 200 micro-insurance

The company is one of the insurance companies that participated in the "200 Insurance" project in collaboration with the Office of Insurance Commission (OIC). 200 Insurance is a personal accident insurance for individuals which provides a coverage of 100,000 baht for death, loss of hands, feet, and sight, and permanent disability caused by an accident, 50,000 baht for homicide, and 10,000 baht for death caused by an illness. The annual premium is 200 baht for people aged 20 to 60 years old with an aim of providing the opportunity for people of all levels to purchase accident insurance at an affordable price.

4. Home fire micro-insurance

The company is one of the insurance companies that participated in the "Affordable Home Fire Insurance Policy for Retail Buyers" in collaboration with the Office of Insurance Commission (OIC). This home fire insurance provides coverage for residential building damage caused by four types of incident consisting of fire hazards, lightning, explosion (the insured amount for concrete buildings is 300,000 baht, for half concrete half wood houses is 150,000 baht, for wooden houses is 100,000 baht, for wooden shop houses is 50,000 baht) and natural disasters (such as storm, flood, earthquake, and hail with the total insured amount of no more than 10,000 baht). If the damage causes the insured to not be able to live in their homes and need to find a temporary accommodation, compensation of no more than 300 baht per day will be provided but for not

more than 30 days with an insurance premium of only 400 baht per year. The objective is to provide the opportunity for people of all levels to purchase insurance at an affordable price for damage protection.

5. Maize insurance

The company is one of the 24 companies participating in the Maize Insurance Programme with the objective of providing financial protection for farmers in the target areas of 3 million rai of maize plantation, supporting farmers to grow maize after the rice farming season to prevent the oversupply of rice and price slump, and reducing the costs and risks that may occur to the crops. Farmers would receive coverage for eight types of natural disaster including floods or heavy rains, drought or intermittent rain, storm or typhoon, cold weather or frost, hail, fire, and wild elephant. Farmers would receive the basic coverage of 1,500 baht per rai (Part 1) and an additional coverage of 120 baht per rai (Part 2). For coverage for pests and disease epidemics, farmers would receive a coverage of 750 baht per rai (Part 1) and an additional coverage of 120 baht per rai (Part 2). If the governor announced the insurance area as the area for emergency disaster victims, farmers who purchase the insurance (Part 1+Part 2) would receive coverage of up to 1,740 baht per rai and coverage for pests and disease epidemics of 870 baht per rai. The insurance is available at the Bank for Agriculture and Agricultural Cooperatives to provide farmers with easy access to insurance.

6. Longan micro-insurance

The company is one of the two companies that participated in the Retail Longan Crop Micro-insurance Against Drought Programme using the drought index (measured by satellite) sold through the Bank for Agriculture and Agricultural Cooperatives (BAAC) to provide risk protection against drought for farmers. The insurance is available in five northern provinces consisting of Chiang Mai, Chiang Rai, Pa Yao, Nan, and Lampoon with the first sales in January and February 2020 in order to provide protection against drought for longan farmers during March and April 2020. Farmers who borrowed from the Bank for Agriculture and Agricultural Cooperatives (BAAC) can request one unit of insurance for every 10,000 baht of the amount borrowed with a premium of 399 baht per coverage unit with a maximum coverage of 2,100 baht. The coverage is divided into two parts including 900-baht compensation in the event of longer drought period than the drought index and 60-baht compensation per day in the event of continuous drought from the drought index, not exceeding 2,100 baht in total. However, if the insured area faces continuous drought (having no rainy day or daily rain of less than one millimetre consecutively) for more than the number of days determined as the drought index, the company will pay compensation to farmers through their BAAC accounts.

7. Milk cow insurance

The company co-operated with the Bank for Agriculture and Agricultural Cooperatives (BAAC) to distribute milk cow insurance through the bank, which has more than 1,000 branches. Dairy farmers (the insured) receive coverage for the loss or damage in four cases: 16,500 - 18,000 baht of the sum insured for the death of milk cows caused by accidents, fire, lightning, flood, landslide, storm, and earthquake, 16,500 - 18,000 baht of the sum insured for the death of milk cows caused by illness, 3,300-3,600 baht of the sum insured for the loss caused by milk cow's illness due to foot-and-mouth disease which prevents cows from producing milk, 1,650-1,800 baht of the sum insured for the loss caused by milk cow's illness due to mastitis. The compensation will be paid according to the agreed amount as specified in the insurance policy per cow per year. The insurance premium is between 600-1,257 baht for the dairy cow aged at least 18 months but not more than 8 years and all cows on the farm must be in healthy conditions guaranteed by a health certificate from a vet.

- Excellent service projects during the New Year's and Songkran festivals

The government and private sector are aware of the high number of road accidents in Thailand, causing the loss of life and property and holding back the country's development. As a result, there have been campaigns and various projects aimed at reducing the number of road accidents and losses. Realising that car insurance is an important part of the insurance industry in Thailand, the company has introduced the "2019 Excellent Service during the New Year's and Songkran Festivals" project in collaboration with the Department of Highways and the Expressway Authority of Thailand to facilitate both the public and government officials who perform accident prevention duties during the festivals and to provide car insurance services during the New Year's and Songkran festivals which are the periods when the road is used the most and have the highest numbers of road accidents during a year.

The "2019 Excellent Service during the New Year's and Songkran Festivals" project carried out the following activities:

1. Assigned accident inspectors and operational staff at service points in provinces to provide quick services and increased the number of service personnel in areas with heavy traffic, main roads, and tourist attractions.
2. Increased the number of accident reporting and operational staff to meet customer demand during festive seasons to ensure timely services.

- Knowledge and access to insurance

Consumers' knowledge and understanding of insurance is important. Even though technology has increasingly been used to connect information, some consumers do not have access to information about insurance, resulting in some consumers not see the importance of insurance which will reduce the risk of life and property in unforeseeable events. As an insurance provider, the company has become a part of the effort to disseminate knowledge and promote the understanding of insurance among the public as well as provide access to information as follows:

1. Create content and disseminate knowledge about insurance including car insurance, health insurance, travel insurance and other insurance online through websites and social media
2. Collaborate with key opinion leaders to raise consumer awareness and promote the importance of insurance that helps reduce the risk of life and property.

Employee care

The Board of Directors recognizes that employees are its valuable assets who must be provided with care and develop capabilities for efficient work readiness and set policies for the company to focus on developing its employees at all levels to increase their knowledge, abilities, and skills and to create positive attitude. The company pays attention to knowledge development, particularly in terms of technical knowledge, by providing internal and external trainings.

In terms of compensation, the company has a policy to provide fair compensation and welfare of employees as follows:

Short-term: The company evaluates employee performance twice a year, provides salary increases that take into account the market and competition together with their performance, and offers bonuses based on the company's profitability.

Long-term: The company provides long-term compensation by considering the balance between monetary and non-monetary rewards together with employee needs and the company's financial conditions in the long term.

In terms of benefits and welfare, apart from annual leaves, the company also places an emphasis on health care and the quality of life of its employees, including their families. A variety of benefits that the company offers to its employees aims to make employees happy at work in order to enhance employee productivity.

After probation, all employees will become the company's full-time employees and receive the following compensations and benefits from the company:

- Welfare for good quality of life

Provident Fund: The company encourages employees to save for retirement by setting up a provident fund for employees who have worked for the company for at least three years, consecutively. Employees who are members of the fund pay a contribution at the rate of 5, 10, or 15 percent of their monthly salary and the company pays a contribution to the fund at the rate of 7.5 percent of their monthly salary. The provident fund is managed by a fund management company who is the fund manager.

Employee loan: Employees are entitled to borrow from the company after three years of employment. The objective of the loan must be for housing, medical care, or education.

Financial assistance for employees and their families: for employees' weddings and their parents' funerals

Medical treatment: Aside from providing social security as required by the labour law, the company has set up a nursing team from Chulalongkorn Hospital to provide first aid and conduct a diagnosis for cases that are serious and must be sent to the hospital. The service is available every working day at the head office building, which is the main place of operations.

Accident insurance: For employee welfare, the company provides personal accident insurance to employees in the event of death caused by accident to ease the burden of the employee's family.

Health insurance: To increase convenience for employees, the company has provided health insurance to support employees' medical care in addition to the medical treatment benefits under the social security programme.

- Changes in employee care and development

The company has provided trainings to develop the capacity of employees on a regular basis, both on the knowledge of insurance and other skills necessary for providing insurance services and operations. In 2020, after the company's work restructuring, the personnel development department became clearly separated from the human resource management department with the aim of greater efficiency in personnel development.

Initially, the company provided two training courses to new employees in 2020 as follows:

Class 1: 16 September 2020 with 20 new employees attending

Class 2: 16 November 2020 with 25 new employees attending

“Basic Insurance Product Knowledge” course by Khun Pornkarntima Polsong, Khun Duangchuda Prueksapisarn at Thaivivat Insurance Building, 6th Floor Meeting Room, with the objective of providing basic knowledge about insurance and knowledge about organizational structure and employee benefits

Online training courses on self-assessment for 2020 performance evaluation were offered via Microsoft Teams application.

Class 1: 2 October 2020, 10 PM – 11 PM

Class 2: 2 October 2020, 11 PM – 12 PM

After receiving the basic trainings, the company also organises training courses that increase employees’ skills and are practical for work. In 2020, important training courses include:

-The 2nd Professional Valuation Techniques for Conflict Resolution course by Khun Kanokchat Thavoranan to enhance the skills of our personnel in professional and fair valuation of car damage for our partners and customers.

-The 1st Understand Situations and Claims course by Khun Ongsa Kamolwiboon to develop claims handling skills for claims personnel and to share the experience of claims personnel in and outside Bangkok.

-“Work Process Reduction and Modification in Power Vision” to increase speed and workpiece, reduce work processes, and increase the accuracy of car claims reimbursement.

-Understand the Laws and Regulations of Claims in Car Insurance Verdicts and Arbitrations by Khun Patcharin Boorapatsiri and Khun Jureeporn Onsamrong to develop knowledge and understanding of employees about the laws and regulations on claims. The course was offered four times.

-“How to Use SmartFleet CallTaker” to find accident spots in a timely manner to ensure convenience and speed for customers.

-“SPSS for Statistical Insurance Data Analytics” for the company’s personnel to increase the ability to analyse statistical data of insurance. The course was offered three times.

-“Effective Insurance Premium Management for Your Goals” to enhance the skills in boosting insurance premiums to meet the targets. The course was offered twice.

-“How to Effectively Sell Your Products to Customers” to improve the sales skills for salespersons and learn about new sales techniques. The course was offered three times.

-“CompTIA Security +” with the objective of supporting and developing data security experts for the labour market and digital economy. One employee attended the course.

-"Work Shop LAN & Wireless Network" course with the objective of developing more data security experts for the labour market and to keep up with the digital economy. One employee attended the course.

-"Personal Data Protection Law: Procedures and Practices Class 5 and 6" course with the objective of creating an understanding of the principles and essence of the Personal Data Protection Act B.E. 2562 (2019); for example, the relationship of digital legal system, important terms, interpretation, enforcement, exceptions, penalties, and impacts on businesses.

-"Personal Data Protection Law for Human Resource Management" with the objective of creating an understanding of the principles and essence of the Personal Data Protection Act B.E. 2562 (2019) as well as the impact and preparation for compliance of the human resource management department.

-“Prepare for the Personal Data Protection Act B.E. 2562 (2019) for Human Resource Management” by Khun Panu Nuernoom to prepare for changes in the personal data protection law

In addition to internal trainings, the company also sends employees to attend training courses related to work organised by external parties. The company considers sending personnel in departments which are related to the topic of the training or seminar sessions. The company sends personnel to attend training and seminar sessions for eight hours per person on average.

- Employing people with disabilities

The company welcomes people with disabilities for work in appropriate positions that are suitable for their physical abilities and in which their physical disadvantages do not hinder work performance. The company also sets the standard for compensation and provides equal opportunity for career advancement.

In 2020 until the present, the company has six employees with disabilities.

one visually impaired employee

five hearing impaired employees

Labour relations The company engages with employees through numerous activities every year with a focus on fostering a good relationship between employees and departments across the organization. Employees have the opportunity to learn to work in teams as well as coordinate and collaborate on various occasions, leading to a more harmonious work environment. Employees are also encouraged to exercise and engage with the company.

Workplace safety The Board of Directors concern about the welfare, health and safety of employees and realise that those issues affect the quality of life and is one of the factors that help promote efficient operations and confidence at work. The Board of Directors set policies and allow the company to prepare appropriate and important precautionary measures in advance. Key measures include:

- Taking preventive measures, promoting knowledge on fire prevention, and conducting fire drill every year as well as regularly examining fire distinguishing equipment and warning systems to ensure our personnel’s knowledge of proper practices and ability to handle real situations. In 2020, the company organised the fire prevention training on 14 November 2020 instructed by the Phra Khanong Fire Station, Fire and Rescue Operations Division 2, Office of

Disaster Prevention and Mitigation. The 2020 annual fire drill was conducted on 17 November 2020 at Thaivivat Insurance Building supervised by the Pha Khanong Fire Station's staff.

- Safety-related policies and procedures for operational staff and accident inspectors. For staff who need to drive a car or a motorcycle for work, especially accident inspectors (claims staff) and customer service staff and agents (employees sending policies and documents), the company has safety rules and regulations for individuals (driving strictly in accordance with traffic regulations, properly dressed with uniforms, having reflective strips as required by the company, and wearing a helmet and fastening a safety belt) and vehicles used (the company's car that passed the inspection test, has a camera installed, and has GPS attached to the staff). There are also strict penalties for lack of traffic discipline. In 2020,

- There are five accidents during work. The injured staff were two Bangkok operation staff (accident inspectors) and three Finance and Investment staff. All have already recovered.

Annual health checkup : Today, in response to new diseases and unhealthy lifestyle, early detection and prevention are the best ways to reduce health risks. To prevent important health risks, annual health checkups will help identify health risks based on examination results and provide a guide for healthier lifestyle.

On 26 September and 3 October 2020, the company organised an annual health checkup for employees to promote employees' good health and good quality of life, allowing employees to work productively and the organization to thrive. The health check-up was conducted by Bangpakok 9 Hospital at the company's headquarters.

COVID-19 prevention measures : Due to the continuous spread of coronavirus (COVID-19) which is affecting people in Thailand and around the world, the company recognises the safety and health of our employees and families and that during these times, we need to come together and act for the benefit of society at large during the time of this pandemic by strictly following the Communicable Diseases B.E.2558 (2015) and the Notification of the Department of Disease Control, Ministry of Health.

To continue to provide best customer services and create confidence and safety for our customers, employees, employees' families, society, and country, the company has established strict measures as follow:

1. Allow employees to work from home to reduce the commute time and the risk of the spread of COVID-19
2. Increase safety measures in the office building. The company strictly conducted screening measures, fever screening and asking the travel history of people entering the building.
3. Ask employees to wear a surgical or cloth mask at all times, avoid sharing food, wash hands regularly, and keep social distancing of 1-2 metres. On top of that, the company published knowledge and guide for self-protection from the virus widely and continuously.
4. Support personal protective equipment to all employees. The company has distributed cloth masks, alcohol gel, and hand sanitisers to reduce the costs for our employees and families when there is a shortage. Additionally, the company conducted big cleaning for the entire building.
5. Introduce a measure if the company learns that the company has employees with suspected or confirmed COVID-19 even though no employee has been infected.

Engagement in community and social development

The Board of Directors recognize community and social development based on the basic principles of human rights in its business processes and community and social development activities such as human resource development. As personnel is a key factor for business development and sustainability, the company has a policy to treat all employees and stakeholders equally without discrimination on race, gender, religion, ethnicity, nationality, social status, or disability as well as to respect and accept all differences in belief, social status, environment, law, and culture (see also "Employee Care" section). In 2019, the company has promoted community and social development through donations and charitable events as follows:

- Activities to promote education

The company continues to support human rights and equality among people in the society, especially the right to basic education, since it realizes that creating human resources who are highly competent and ethical is a crucial part of the country's stability and development. In 2020, the company provided assistance in education as follows:

- The company has provided financial support for the Reducing Inequality through Quality Early Childhood Education project (RIECE). RIECE Thailand is a project that aims to ensure that preschool children will grow into quality and productive adults at Thasongkorn Subdistrict Child Development Center (Bann Bor Noi), Maha Sarakham province. Research in educational economics over the past decades clearly showed that early childhood development plays an important role in building human capital for the country's population which will help increase the productivity of the society, reduce social costs that may be caused by crimes and drug addiction. The company recognises the importance of education and has therefore become a part in sustainably supporting basic education of Thai preschool children. Activities and follow-ups were conducted continuously in 2020.

- Reducing Inequality through Quality Early Childhood Education: RIECE Thailand

The effectiveness of teaching and learning for children is important since they are the future of the nation. Therefore, support for increased educational effectiveness is a priority for both the public and private sectors. The company has always recognized the importance of improving educational effectiveness for children and youth. As a result, in 2019, it collaborated with the Reducing Inequality through Quality Early Childhood Education project or RIECE Thailand by donating 150,000 baht to ensure the success of the project.

The project aims to ensure that preschool children will grow into quality and productive adults who will provide stable income for their families, be able to take care of themselves and their family, be socially responsible, and have good judgment that avoids creating any social problem such as crimes, drug abuse, or gambling.

Research in educational economics over the past decades clearly showed that early childhood development plays an important role in building human capital for the country's population which will help increase the productivity of the society, reduce social costs that may be caused by crimes and drug addiction. Early childhood development also helps reduce economic and social disparity in the country caused by differences since the beginning of life which is an important root cause for the current economic and social disparity.

Donations for social and community development

- Society and community:

The Company donated to organisations and departments in 2020 as follows:

- Over the year 2020, the continuous spread of COVID-19 affected countries around the world including Thailand. A shortage of medical supplies and protective equipment, especially surgical masks, can increase the risk of the spread of the virus to healthcare workers and the general public. Thaivivat Insurance Public Company Limited donated to 1,000,000 baht to the research team of Thammasat University to produce ThamMask, a water-resistant mask, for distribution to healthcare workers in areas with mask shortages in order to reduce a shortage and boost morale of dedicated healthcare workers. The production of water-resistant masks aims to prevent virus transmission and boost morale of healthcare workers who have worked tirelessly for all of us. To get through these difficult times, we must come together in the fight of COVID-19.

The water-resistant mask, ThamMask, invented by the research team of Thammasat University is a three-layered mask with the first and second layers made of cotton silk structured by polyester microfiber, which is waterproof, dustproof, soft, and breathable coated by NUVA-811. Microns are inserted into the fabric where water cannot penetrate. The innermost layer is made of cotton which can absorb moisture and secretion with good ventilation and can be washed up to 30 times. The aim was to reduce a shortage and high price of face masks which has directly affected consumers.

- The company realises the importance of helping and taking care of everyone's health and introduces strict measures to best prevent the spread of the virus in the organisation and to increase confidence and safety for customers, employees, employees' families, and the general public. Additionally, special privileges were offered to the company's insured during the outbreak of COVID-19 including:
 - For annual international travel insurance and on-off travel insurance with coverage on 1 April 2020, the company would automatically expand the coverage period for three months starting from the last date of the previous coverage without additional insurance premiums.
 - On-off car insurance with COVID-19 coverage of 100,000 baht for six months for new policy purchase or renewal for a period of 12 months starting from 23 March 2020 to 30 April 2020 (offered in collaboration with Premium Direct Broker Company Limited)
 - Thaivivat Active Health Insurance specially covers COVID-19 screening test for up to 2,000 baht for the insured. The policy provides coverage from 23 March 2020 to 30 April 2020.
- On 22 May 2020, the company organised the Beyond the New Normal for the Thai People activity and introduced the top-up on-off insurance through an online channel in collaboration with Thailand's famous influencers including Khun Ban Pitipat, Khun U Spin9, and other special guests broadcasted live on social media the new top-up on-off insurance with an annual insurance premium for the first class insurance starting at 4,900 baht, saving up to 70 percent, with 24-hour coverage and automatic on-off feature #Koomkrongyaitaejailek and a discount promotion of up to 1,000 baht for the first 3,000 insurance policies. Part of the proceeds is donated to support COVID-19 testing machines for 10 public hospitals nationwide.

- In June 2020, the company went to medical school hospitals nationwide to donate modular swab unit for COVID-19 screening worth 2.6 million baht to support screening test and work of healthcare workers. The equipment allows medical workers and healthcare professionals to quickly and safely screen patients with COVID-19 risk using pressure control and air circulation of the unit, efficiently reducing the risk of infection.

The continuous spread of COVID-19 affected countries around the world including Thailand. One of the crucial problems is a shortage of medical supplies and protective equipment including screening tools. Even though the situation in Thailand has gradually improved and the number of patients has decreased, the situation remains a concern. Preparation for the spread of the virus, especially of medical supplies, is essential; therefore, the company organised the Together with On-off Insurance Customer project, using part of the proceeds from insurance premiums of on-off insurance owners from 1 April – 31 May 2020 to purchase COVID-19 screening test kits.

With this purchase of modular swab unit, the company aims to provide safety and reduce the risk of work for healthcare workers, allow them to screen the virus efficiently, and allow people more access to COVID-19 screening. To get through these challenging times, we must take care and prevent the spread of the virus, not only for self-protection but also for helping medical workers.

- On 25 August 2020, 10 of the company's employees donated blood in collaboration with the Thai General Insurance Association to improve the life expectancy of patients. Since the amount of blood in the blood bank is low and more blood is needed, the Association acted as the center for blood donation.

Environmental management

The Board of Directors committed to preserve the society and environment by conducting business based on ethics and good governance along with care for the society and the environment in order to ensure sustainable business development. Even though Thaivivat Insurance is not in the manufacturing industry that requires extensive natural resources in the production line, but it cannot be denied that the company consumes energy and resources to operate its business. The company, therefore, places an emphasis on raising awareness of minimal and efficient resource consumption as well as environmental responsibility among its personnel.

- On 29 June 2020, the company provided fire insurance policies worth 150,000,000 baht of protection to the Sirindhorn International Environmental Park Foundation to support the foundation in carrying out activities to rehabilitate and conserve the environment since the Sirindhorn International Environmental Park is a learning and training center for the rehabilitation and conservation of natural resources, the environment, and energy following the royal international initiative, innovation that connects science, technology, and local wisdom, and promotion of the application of the sufficiency economy philosophy for sustainable community development. The park has a local and international network of research and knowledge development with an aim of promoting knowledge and understanding of environmental rehabilitation and energy conservation following the royal initiative among children, youth, local community scholars, and the general public.

- Internal waste sorting

The current hazardous waste problem is affecting environmental quality and the quality of life of employers, employees, and the general public. The high amount of polluting waste is partly stored and disposed according to law, but waste which comes from office, public agencies, and stores remains unregulated, resulting in hazardous waste being improperly disposed and destroyed, contaminated in the environment, and affecting the health of people exposed to it.

As a result, the company has initiated the waste sorting project in the office to create awareness for the company's personnel and properly sort waste by separating waste into categories for convenient disposal and better health of the company's personnel, limiting order time, and promoting the use of personal containers to reduce the amount of waste in office.

- Electronic product development for the environment (reduce paper usage)

In 2020, the company has improved and developed its business to become more electronic to promote environmental preservation by reducing the amount of paper used. In Thailand, it has been found that 34 kilograms of paper is consumed per person per year or 2 million tons per year and the consumption rate increases by 15 percent each year (according to the Bureau of Waste and Hazardous Substances Management). As a result, the company recognises the importance of making the most of paper usage to reduce the amount of waste produced and reduce the use of natural materials and energy in paper production as follows:

1. Publicized / promoted compliance with the guidelines to reduce paper use through various activities.

- Paper reuse (use both sides of the paper)
- Paper sorting (Paper with blank pages, colored paper, and white paper) for recycling purposes

2. Developed electronic trading system by allowing customers to choose online distribution channels. Products have been developed to be available online such as car insurance and travel insurance which can be purchased online without using paper. Additionally, the insured can choose to receive insurance policies through various electronic channels such as email and mobile application instead of paper insurance policies, reducing paper usage and promoting energy and environmental conservation.

- Switch from chiller air conditioning system to VRV system

Electric power is a crucial factor in life and the country's development, and the demand for electricity in Thailand is expected to rise. The country's electricity generation currently relies on fossil fuels as the main source for power generation, which will be exhausted in the near future. To reduce the shortage of electric power in the future, we must take part in saving the electricity and make the most out of it to secure our energy future.

The company recognises the importance of energy saving; therefore, it has changed the company's air conditioning system from the chiller system to VRV system which is a technology that directly controls the amount of refrigerant by installing the refrigerant supply control on the indoor unit to accurately control the temperature and save up to 25 percent of energy compared to other air conditioning systems. Additionally, the system will control the air quality by ventilating, dehumidification, and other processes to make the personnel in the office feel comfortable and breathe easily.

- Installation of water spraying equipment on the roof of the building to reduce the level of PM 2.5

In 2020, the company realizes the importance of health as a result of the PM 2.5 problem in Bangkok and Parimonthon and has engaged in addressing the problem together with the Phayathai District Office by installing a water spraying equipment on the roof of Thaivivat Insurance Headquarters, Din Daeng to reduce the amount of the particles which requires water spraying equipment with 120-150 PSI pressure. The company turns on the machine every day, twice at 9-10AM and 4-5PM until the level of the particles decreases.

11. Internal Control and Risk Management

In 2020, the company had direct premium written Baht 5,975 million with growth rate 24 percent which was higher than total non-life insurance business and in 2020 the company had market share of motor insurance in the 9th ranking. (In 2019, 12th ranking)

Economic condition

SET closed 1,449.35 points at the end of December 2020, decreased 8.23%, market value of 16,343 billion Baht decreasing 3.65%, dividend yield 3.32%, PE 28.84 and P/BV1.64

Economic conditions fell as a result of the COVID-19 pandemic that started out in Wuhan, China since January and spread all over the world at the end of March. The government declared a state of emergency throughout the Kingdom to contain the outbreak, affecting the economy growth previously expected in 2020 2.8% as well as the drought, delays of the

Annual Budget Act and higher unemployment from a slowdown in exports made the economy expansion -6.4% compared to 2.4% growth last year. The Monetary Policy Committee (MPC) resolved to reduce the policy interest rate three times from 1.25% to 0.5% while Fed cut interest rates to 0% from 1.5% from the severe contraction more than previous forecast in March. Thai bond yield fluctuates with the world money market conditions due to selling of fixed income funds. The Bank of Thailand (BOT) bought government bonds, cut the policy interest rate causing the decrease of government bond yield and made the overall financial situation more relaxed.

Government measures to mitigate impacts : the Borrowing Act in a limit of not more than 1,000,000 million Baht for an additional budget to support, cure and rehabilitate the economy and society affected by the epidemic 600,000 million Baht and the rest amount 400,000 million Baht to increase potential, trade, production and services in the major economic sectors of country and local level as well as to create jobs, careers, market and products promotion.

The Soft Loan Act 500,000 million Baht for the BOT to lend to commercial banks and financial institutions at a rate of 0.01% per year with a credit limit of 500,000 million Baht by setting Corporate Bond Liquidity Stabilization Fund (BSF) to reduce risk of raising funds in corporate bonds. The BOT can trade in funds where the fund buys corporate bonds to increase companies liquidity that issue and rollover high quality bond but have temporary liquidity shortage. The BOT can urgently trade in corporate bonds in the secondary market to stabilize the corporate bonds market and financial systems.

The temporary remittance rate reduction of financial institutions from 0.41 percent to 0.23 percent per year in order to lower cost of financial institutions.

Measures of low-interest loans for the Government Savings Bank to lend to Non-Banks for helping small debtors of each company by releasing credit card loan conditions, personal loans, leasing, motorcycle hire purchase and car registration loans to the public.

Measures of reducing contributions to the Social Security Fund of employers and employees, increasing unemployment compensation due to dismissal to 75% from 50% for 200 days and increasing unemployment compensation from resignation to 45% from 30% (base salary not exceeding 15,000 Baht) for 90 days. Remedy measures for insured employees who have not worked due to force majeure, they receive compensation for their lack of income 50% of wages. In case of a government agency orders the employers to temporarily stop the business, they receive compensation for lack of income 50% but not more than 60 days. Temporary workers and self-employed career outside the social security system, receive each compensation 5,000 Baht per month for 3 months in the amount 45,000 million Baht.

Economic Trend and Stock Market in 2021

Tourism sector has been greatly affected from the COVID-19 pandemic, the measures of lockdown and travel restrictions in each country, including Thailand resulting no tourist has come since April. The number of tourists dropped

from 39 million to be only 6.7 million affecting the hotel business, aviation and related services sectors such as SPA, foreign hospitals, shopping malls. The tourism sector recovery takes at least 2-3 years, the number of tourists is expected to return in the second half of 2021 and employment related to the tourism sector has recovered slowly.

Exports in 2020 were -7.5%, an increase -2.6% last year due to the weakness of trading partners. Exports are expected to recover as the global economic recovery. The IMF forecasts that the global economy in 2021 will expand by 5.2% from -4.4% in 2020, especially in electronics sector and packaged food. The export proportion of motor vehicles and machinery is high that will recover slowly compared to fast recovery of electronic components and packaged food resulting Thai exports will recover lower than competing countries.

Private investment and household consumption, the impact of COVID-19 pandemic has disrupted economic activity, especially in tourism and airline service sectors. The oil consumption is greatly reduced. resulting private investment -11% and consumption -1.1% Household debt to GDP rises to a maximum 83.3%, unemployment increases to 4.4%, total demand contracts from the epidemic prevention measures resulting oil price falling as low as \$ 28/barrel in the second quarter 2020. Household consumption trend remains weak from higher debt levels, cautious spending, gradual investment increase from a rising export trend and industrial production driven by widespread post-vaccine demand to deter the epidemic.

Public spending is a key factor to help revive private and household consumption through accelerating disbursement of the annual expenditure budget in 2021, using the remaining loan of 1 trillion Baht for an increase of trade potential, production, job creation and construction. The public debt to GDP expects to rise closely 60% due to an increase of government borrowing while the taxation is less than estimated.

The SET index is expected to gradually rise to 1600-1620 points, PE 20-23 on vaccines expectation to control the COVID-19 epidemic, including an increase of US 10-year bond yields 1.5% from 0.915% at the end of 2020 for the stimulus programs together with global monetary and fiscal measures to stimulate the global economy. For Thailand, in addition to the economic stimulus measure through the loan 1 trillion Baht continued from last year, the policy interest rate is expected to decrease continuously 0.25% by the MPC from the beginning of last year that it was reduced three times to help support household consumption and private investment.

Banking and credit groups expects to rise moderately 4.5% from retail and project loans, while banking NPLs rise to 4.5% from SME loans due to the end of debt relief programs. Capital strength is sufficient and reserve fund is 114%.

Competition of consumer finance will increase, especially car loans, according to the Bank of Thailand regulation stipulates to decrease the maximum credit interest rate 200-400 bps. However, the MPC decreases the policy interest rate down, it helps reduce capital costs, compensate for the decline in credit interest income, spending and careful using of citizens credit cards.

Energy group, demand for oil consumption gradually recovers from relaxation of entering and leaving the country. But the aircraft fuel will recover slowly due to tourism has not recovered. The average market price in 2021 is expected to stabilize at 2.30-2.40 Baht / liter.

Travel group, the recovery depends on ability to control the virus spread of the virus. But there is still a risk of new pandemic. The tourism recovery is expected to begin mid-year. It will take 2-3 years for recovery of 40 million tourists before virus epidemic.

In 2021, the insurance premium growth rate of non-life insurance business will grow approximately 2.5% as an expansion trend 4-5% of the Thai economy that comes from the number of foreign tourists returning in second half of 2021 resulting positively impact to Tourism sector. The export sector will increase in line with an increasing demand of trading partners. Recovery of private consumption and investment including the expansion of monetary and fiscal measures, employment promotion and investment in large government projects

Accuracy of Information Acceptance

Accuracy acceptance of information in Annual Information Record Presentation Form is given to Authorized Committee Member to sign off company commitment. Sign off and seal with company stamp (if available) in that form together with authorize to any person do the counter sign on that form as well by using the following statement and format.

“Company has revised and checkup the information in this Annual Information Record Presentation Form with careful. Report of the Board of Directors' Responsibilities for Financial Reports

Thaivivat Insurance Public Company Limited 's Board of Directors has given importance to the duties and responsibilities in accordance with the good corporate governance policy, supervise the financial statements and financial information in annual reports to have accurate, complete and sufficient information. The financial statements comply with general accepted accounting standards in Thailand and the relevant criteria stipulated by the Office of Insurance Commission that select the appropriate accounting policies, practice regularly and use discretion carefully including disclose an important information sufficiently in the notes to the financial statements and has been audited and certified by an auditor.

The Board of Directors has established a risk management system, internal control system, internal audit and appropriate supervision efficiently to ensure that the company has accurate, complete and timely accounting records as well as risk prevention from operations. In this regard, the Board has appointed an Audit Committee consisting of independent, non-executive directors to supervise this matter.

The Board of Directors has an opinion that the overall internal control system of company is satisfactory and provide reasonable confidence in the reliability of the company financial statements as of 31 December 2020, which the auditor audited as generally accepted auditing standards and expressed his opinion that the financial statements accurately show the financial status and business operations in accordance with generally accepted accounting principles.

Mr. ChalawFuengarom

Chairman

Audit Committee Report 2020

To shareholders of Thaivivat Insurance Public Company Limited.

The Audit Committee of Thaivivat Insurance Public Company Limited consists of 4 independent directors who are experts and have experience in economics, business administration, accounting, auditing as regulated by the Securities and Exchange Commission, Thailand. Mr. Phisit Setthawong is the chairman of the Audit Committee, Mrs. Pilai Piumpongsam, Mrs. Pranee Phasipol and Mrs. Supaporn Burapakusolsri are the audit committees with 3 years term and Ms. Yupin Trongpitakkul acting as the secretary of the Audit Committee.

In 2020, the Audit Committee Performed duties independently as the Board of Directors assignment with 5 meetings that all committees attended all meeting to carry out their scopes, duties, responsibilities and supervision. The company provided the Audit Committee meetings with auditor, management representative and internal auditor to consider and discuss the issues including giving advice on matters that are beneficial to the company management in accordance with the principles of good corporate governance. The Audit Committee reported the meeting results every time that are summarized as follows :

1) Reviewing the company's quarterly and fiscal year 2020 by auditor and management inquiry about the accuracy, completeness, and reliability of financial report, financial statement preparation in accordance with the Financial Reporting Standards and adequacy of information disclosure. The Audit Committee agrees that the company financial report correctly and appropriately in accordance with the Financial Reporting Standards and the auditors propose unqualified report. In addition, the Audit Committee held one meeting with the auditor specifically without the management and internal auditor. The auditor reported it had freedom to perform and got good cooperation from all departments.
